Summary of Changes to Measurement & Payment and Master Bid List Documents

January 31, 2005

M&P changes:

The M&P program (macro) was changed to correct the fonts in the final document. The previous version created a mixture of fonts. The M&P template (**Measurement and Payment.dot**) has been updated for UDOT users (on the S drive) and a corrected template has been put on the website for other users. The **projectbid.doc** file has been placed on the web also and must replace the old file on your C drive for the corrections to take place when you run the program.
